

CABOT MICROELECTRONICS

WHO WE ARE

Headquartered in Aurora, Illinois, USA, Cabot Microelectronics Corporation (CMC) is the world's leading supplier of chemical mechanical planarization slurries (CMP) and a growing CMP pad supplier to the semiconductor industry. Our products are used to level, smooth and remove excess material from the multiple layers deposited upon silicon wafers in the production of semiconductor devices.

HOW WE SUPPORT THE JOHN C. DUNHAM STEM PARTNERSHIP SCHOOL

Our employees are frequently engaged in a number of activities in full support of the John C. Dunham STEM Partnership School. Examples of these engagements include participating in partner meetings with teachers in developing curriculum, providing presentations to students, offering field trip opportunities, and fostering professional development and support to teachers. Additionally, CMC annually participates in STEM career fairs, speaker series, and conferences. Our employees enjoy the opportunity to be advisors to the STEM students.

HOW WE USE STEM AT CABOT MICROELECTRONICS

STEM is the foundation of our organization. Without STEM, there would not be a Cabot Microelectronics. Our mission speaks to the importance of STEM: To create value by developing reliable and innovative solutions, through close customer collaboration, that solve today's challenges and help enable tomorrow's technology. The 'T' drives our products and processes allowing us the ability to meet our customers' ever changing needs.
