

NICOR GAS

WHO WE ARE

As the largest natural gas distributor in the state of Illinois, Nicor Gas provides American, abundant and affordable natural gas safely and reliably to more than 2.2 million customers in more than 650 communities. Nicor Gas' parent company, AGL Resources, is one of the nation's preeminent distributors of natural gas.

HOW WE SUPPORT THE JOHN C. DUNHAM STEM PARTNERSHIP SCHOOL

Nicor Gas believes part of its responsibility is to give back to the communities it serves, and is proud to support the John C. Dunham STEM Partnership School. In addition to providing funding, Nicor Gas also serves as a resource for the school. Nicor Gas assisted in designing the curriculum framework and developed an interactive display to connect classroom concepts to work in the field. Nicor Gas employees frequently visit the school to present on a broad range of topics for students and teachers.

HOW WE USE STEM AT NICOR GAS

STEM is at the core of Nicor Gas' business. Nicor Gas uses concepts from science, technology, engineering and math each day to manage its gas distribution operations and run its organization.

Whether employees are operating and maintaining the 33,000-mile distribution system, or managing financial aspects of the company, STEM is critical to Nicor Gas' success.
